

# WHAT CAN & CAN'T GO IN A SKIP BIN!

The identification of your waste type is normally fairly straight forward, however it is important because certain waste types are prohibited from being placed in skips and also in many cases, the waste type affects the price of skip services. Therefore it is important to correctly specify your intended waste type because placement of other waste types may result in additional disposal charges after the skip is collected. The table below provides some guidelines. If you have any doubt as to which waste type your waste belongs, please feel free to call Jim's Skips and our experienced staff will happily assist you.
